Dear Sir:

Armour
Institute of Technology,
Library Class,
Chicago.

To Whom it May Concern: -

The young woman who
sometime ago left our
school has been obliged
through peculiarly sad
fortune to earn her
own living. She
bravely went into the
Public Library and has
worked a year or
more already learning
Cataloguing and
incidentally making

of the other subject
treated in Library
Economics - A few
days ago, a patron
of the school signified
his willingness to assist
her somewhat to finish
more speedily help her
self. I think I would
know a friend who
would board her
and of such person
the case, only
arrangements with you
remain to be considered

Could she, having had
the equivalent of a high
school and post graduate
course, together with her
practical work in the
library, double the
first and second and
third terms of work into
two terms and come to
you at the beginning
of the second term?
Are any scholarships
offered a second year
to such as prove efficient

or any loans arranged
which could be paid
after a position had been
secured. Her education
is sufficient. I know
that questions of entrance
are unnecessary. The
amount of money that
can possibly be expended
through is the important
question. Any information
gladly received by
Miss Caroline E. Cooper
