1967 Editor. Contributions to History of Geology, a series of facsimile reprints of classical early books on geology Hafner Press, New York

1969 Consulting Editor, Hafner Press, New York

1971 Honorary Life Member, Ohio Academy of Science

Died Feb. 1985

BIOGRAPHICAL SUMMARY (continued)

George White published about 100 articles, bulletins, and maps on glacial geology and articles on history of early geology of the United States. He was a consultant to the Geological Survey of Ohio and associated with Stanley M. Totten in preparation of maps and reports on glacial geology. Among his publications on Ohio geology were bulletins and monographs on glacial and groundwater geology of Stark, Ashtabula, Portage, Trumbull, Holmes, Wayne, Cuyahoga and Summit Counties in the Allegheny Plateau. His earlier work was on bedrock geology, with emphasis on coal, clay and limestone deposits. After 1945 his work was mainly on glacial deposits, and especially on their relation to water supply and their environmental and engineering influences. In addition to economic and stratigraphic studies of glacial deposits, he was concerned with studies of history of geology. His special interest in this field was in the history and bibliography of early American geology, on which subject he wrote journal articles. He supervised about 30 Ph.D. dissertations, in geomorphology, glacial geology, and hydrogeology in Alaska, Alberta, Saskatchewan, New Mexico, Nevada, Quebec, New Brunswick, Pennsylvania, Ohio and Illinois.
